CONTENTS FOR VOLUME 11, 1979

Guest Editorial
J. BRIAN BIRD v

Heat Exchange across a Snow Surface at 5365 Meters, Mt. Logan, Yukon
ANTHONY J. BRAZEL AND MELVIN G. MARCUS 1-16

Snow Avalanche Path Terrain and Vegetation, Glacier National Park, Montana
DAVID R. BUTLER 17-32

Rockslide-avalanche across Distributary of Cordilleran Ice in Pasayten Valley, Northern Washington
RICHARD B. WAITT, JR. 33-40

Ground Temperatures and Surficial Transport in Colluvium during Snowpatch Meltout, Colorado Front Range
COLIN E. THORN 41-52

Genesis and Classification of Modal Subalpine and Alpine Soil Pedons of South-central British Columbia, Canada
A. L. VAN RYSWYK AND R. OKAZAKI 53-67

Plant Water Relations in Montane and Tussock Tundra Vegetation Types in Alaska
STEVE OBERBAUER AND PHILIP C. MILLER 69-81

The Aeolian Ecology of White Mountain Peak, California: Windblown Insect Fauna
JOHN B. SPALDING 83-94

Persistence of Cesium-137 in Arctic Lichens, *Dryas integrifolia,* and Lake Sediments
J. SVOBODA AND H. W. TAYLOR 95-108

Problems of Radiocarbon Dating Holocene Organic-bearing Sediments, Cumberland Peninsula, Baffin Island, N.W.T., Canada
R. STUCKENRATH, G. H. MILLER, AND J. T. ANDREWS 109-120

Book Reviews and Books Received 121-124

Variations in Summer Temperature Patterns near Barrow, Alaska: Analysis and Ecological Interpretation
J. P. MYERS AND F. A. PITELKA 131-144

Limnology of Subarctic Canadian Lakes and Some Effects of Impoundment
HAMISH C. DUTHIE 145-158

Morphological Variability and Distribution of Aquatic Invertebrates (Principally Crustacea) from Cumberland Peninsula and Frobisher Bay Regions, Baffin Island, N.W.T., Canada
JOHN H. BUSHNELL AND EARL R. BYRON 159-177

Glacial and Sea-level History of Southwestern Cumberland Peninsula, Baffin Island, N.W.T., Canada
ARTHUR S. DYKE 179-202

Three in situ Paleosols Buried beneath Neoglacial Moraine Ridges, Okstindan and Jotunheimen, Norway
NIGEL J. GRIFFEY AND STEPHEN ELLIS 203-214

Shallow Core Drilling and Bore-hole Measurements in Permafrost of an Active Rock Glacier near the Grubengletscher, Wallis, Swiss Alps
DIETRICH BARSCH, HENRY FIERZ, AND WILFRIED HAEBERLI 215-228

Monitoring and Mapping Sea-ice Breakup and Freezeup of Arctic Canada from Satellite Imagery
B. DEY, H. MOORE, AND A. F. GREGORY 229-242

The Current Regenerative Capacity of the Northern Canadian Trees, Keewatin, N.W.T., Canada: Some Preliminary Observations
DEBORAH L. ELLIOTT 243-251

Application of the Sonic Test to Experimental Freeze-thaw Studies in Geomorphic Research
BARRY D. FAHEY AND ROBERT T. GOWAN 253-260

Book Review 261-262

Himalayan and Trans-Himalayan Glacier Fluctuations Since AD 1812
PAUL A. MAYEWSKI AND PETER A. JESCHKE 267-287

Properties and Relative Age of Soils of Southwestern Cumberland Peninsula, Baffin Island, N.W.T., Canada
J. G. BOCKHEIM 289-306

Hydrochemistry of Meltwaters Draining from an Alpine Glacier
DAVID N. COLLINS 307-324

Nitrogen-fixing Moss Associations in the Subalpine Zone of the White Mountains, New Hampshire
ROBIN LEE LAMBERT AND WILLIAM A. REINERS 325-333

The Vertical Distribution of Live Vascular Phytomass in Cottongrass Tussock Tundra
G. R. SHAVER AND J. C. CUTLER 335-342

Temperature Responses of Germination in Arctic Poppy (*Papaver radicatum* Rottb.) Seeds
A. RANDALL OLSON AND JAMES H. RICHARDS 343-348

The Spectral Efficiency of Phototaxis for Some High Arctic Diptera
PETER G. KEVAN 349-352

The Moss *Aongstroemia longipes*, an Environmentally Sensitive Colonizer of Sediments at Austerdalsisen, Norway
WILFRED H. THEAKSTONE AND A. DAVID KNIGHTON 353-356

Book Reviews and Book Notices 357-364

Contemporary Sedimentary Environments on Baffin Island, N.W.T., Canada: Debris Slope Accumulations
MICHAEL CHURCH, ROBERT F. STOCK, AND JUNE M. RYDER 371-402

Nature and Distribution of Glaciers, Neoglacial Moraines, and Rock Glaciers, East-central Brooks Range, Alaska
JAMES M. ELLIS AND PARKER E. CALKIN 403-420

Surface Movement and Lichen-cover Studies at the Active Rock Glacier near the Grubengletscher, Wallis, Swiss Alps
WILFRIED HAEBERLI, LORENZ KING, AND ANDRÉ FLOTRON 421-441

An Energy-balance Model of Potential Glacierization of Northern Canada
LARRY D. WILLIAMS 443-456

Comparison of the Digestive Tract in Svalbard and Norwegian Reindeer
HANS STAALAND, ENDRE JACOBSEN, AND ROBERT G. WHITE 457-466

Aboveground Productivity and Floristic Structure of a High Subalpine Herbaceous Meadow
DOUGLAS C. ANDERSEN, ROBERT S. HOFFMANN, AND KENNETH B. ARMITAGE 467-476

Book Reviews 478-480

Contents and Index for Volume 11 481-486

SUBJECT AND AUTHOR INDEX FOR VOLUME 11, 1979

Alaska: Barrow summer temperatures, 131-144; Brooks Range glaciers, 403-420; tussock tundra phytomass, 335-342; plant water relations, 69-81

Alpine: heat exchange, Mt. Logan, 1-16; insects, 83-94; Himalayan glacier fluctuations, 267-287; meltwater hydrochemistry, 307-324; rock glacier, 215-228, 421-441; snowpatch meltout, 41-52; soils, 53-67.

Alps (Switzerland): meltwater hydrochemistry, 307-324; rock glacier, 215-228, 421-444

Anderson, D.C., Hoffmann, R.S., and Armitage, K.B. (Aboveground productivity and floristic structure of a high subalpine herbaceous meadow), 467-476

Andrews, J.T. *See* Stuckenrath, R., et al., 109-120

Aongstroemia longipes colonizing sediments, 353-356

Arctic: Alaskan summer temperatures, 131-144; aquatic invertebrates, 159-177; cesium-137 in lichens, 95-108; debris slopes, 371-402; Diptera phototaxis, 349-352; germination of arctic poppy, 343-356; glacial and sea-level history, 179-202; glacierization model, 443-456; glaciers, 403-420; Holocene sediments, 109-120; moraines, 403-420; moss colonization, 353-356; plant water relations, 69-81; reindeer ecology, 467-476; rock glaciers, 403-420; sea-ice breakup and freezeup, 229-242; soils, Baffin Island, 289-306; treeline, 243-251

Armitage, K.B. *See* Anderson, D.C., et al., 467-476

Arthropods: windblown, White Mountain Peak, California, 83-94

Avalanche: path terrain and vegetation, 17-32; rockslide, northern Washington, 33-40

Baffin Island: Cumberland Peninsula; glacial and sea-level history, 179-202, sediments, 109-120; soils, 289-306; aquatic invertebrates, 159-177; debris slope accumulations, 371-402

Barsch, D., Fierz, H., and Haeberli, W. (Shallow core drilling and bore-hole measurements in the permafrost of an active rock glacier near the Grubengletscher, Wallis, Swiss Alps), 215-228

Bockheim, J.G. (Properties and relative age of soils of southwestern Cumberland Peninsula, Baffin Island, N.W.T., Canada), 289-306

Book Reviews

Change and Stability in the Altitude of the Birch Tree-limit in the Southern Swedish Scandes 1915-75. L. Kullman. *J. Major*, 477

Climatic Change and Variability: A Southern Perspective. Ed. A.B. Pittock, L.A. Frakes, D. Jensen, J.A. Peterson and J.W. Zillman. *U. Radok*, 360-361

Die Küstennahe Eisdecke des Westlichen Enderby-Landes: Antarktis. S. Meier. *U. Radok*, 359-360

Fluctuations of Glaciers 1970-1975 (Vol. III). F. Müller. *P. MacKinnon*, 479

Géographie Physique et Quaternaire. Vol. XXXI. *Troisième Colloque sur le Quaternaire du Québec. J.T. Andrews*, 363-364

Jardin de Glaciers. A. Moiroud and J.F. Gonnet. *V. Komárková*, 478-479

Steam Whaling in the Western Arctic. J.R. Bockstoce. *S.P. Ingalls*, 363

The Environment of Amchitka Island, Alaska. Ed. M.L. Merritt and R.G. Fuller. *J. Major*, 121-122

The Mosses of Arctic Alaska. W.C. Steere. *V. Komárková,* 477-478
The Mount Albion Complex: A Study of Prehistoric Man and the Altithermal. J.B. Benedict and B.L. Olson. *W. Dort, Jr.,* 361-363
Truelove Lowland, Devon Island, Canada: A High Arctic Ecosystem. Ed. L.C. Bliss. *P.G. Kevan,* 122-124
Soils of Canada. J.C. Clayton, W.A. Ehrlich, D.B. Cann, J.H. Day and I.B. Marshall. *K.R. Everett,* 261-262
Zeitschrift für Gletscherkunde und Glazialgeologie. Band XIII. *R.L. Armstrong,* 357-359
Brazel, A.J. and Marcus, G. (Heat exchange across a snow surface at 5365 meters, Mt. Logan, Yukon), 1-16
British Columbia: soil genesis and classification, 53-67
Bushnell, J.H. and Byron, E.R. (Morphological variability and distribution of aquatic invertebrates (principally Crustacea) from the Cumberland Peninsula and Frobisher Bay regions, Baffin Island, N.W.T., Canada), 159-177
Butler, D.R. (Snow avalanche path terrain and vegetation, Glacier National Park, Montana), 17-32
Byron, E.R. *See* Bushnell, J.H., 159-177

California: White Mountain Peak aeolian ecology, 83-94
Calkin, P.E. *See* Ellis, J.M. and Calkin, P.E., 403-420
Cesium-137 in arctic lichens and lake sediments, 95-108
Church, M., Stock, R.F., and Ryder, J.M. (Contemporary sedimentary environments on Baffin Island, N.W.T., Canada: Debris slope accumulations), 371-402
Climatic change: energy balance model of glacierization, 443-456
Climatology: Barrow, Alaska summer temperature patterns, 131-144
Collins, D.N. (Hydrochemistry of meltwaters draining from an alpine glacier), 307-324
Colorado Front Range snow patch meltout, 41-52
Cordilleran ice: Pasayten Valley, Washington, 33-40
Crustacea: Baffin Island, 159-177
Cutler, J.C. *See* Shaver, G.R. and Cutler, J.C., 335-342

Debris slopes: Baffin Island, 371-402
Deglaciation: Cordilleran ice, Pasayten Valley, Washington, 33-40
Dendrochronology: avalanche paths, Montana, 17-32
Dey, B., Moore, H., and Gregory, A.F. (Monitoring and mapping sea-ice breakup and freezeup of arctic Canada from satellite imagery), 229-242
Dryas integrifolia: cesium-137 persistence, 95-108
Duthie, H.C. (Limnology of subarctic Canadian lakes and some effects of impoundment), 145-158
Dyke, A.S. (Glacial and sea-level history of southwestern Cumberland Peninsula, Baffin Island, N.W.T., Canada), 179-202

Ecology: avalanche path vegetation, 17-32; cesium-137 in vegetation, 95-108; Diptera phytotaxis, 349-352; effects of summer temperatures on, 131-144; germination of arctic poppy, 343-348; limnology of Canadian subarctic lakes, 145-158; moss colonization of sediments, 353-356; nitrogen fixing moss associations, 325-333; plant water relations, 69-81; phytomass of cottongrass tussock tundra, 335-342; productivity and floristics of subalpine meadow, 467-476; Svalbard reindeer, 457-466; tree regeneration, arctic Canada, 243-251; windblown insect fauna, 83-94
Elliot, D. (The current regenerative capacity of the northern Canadian trees, Keewatin, N.W.T., Canada: Some preliminary observations), 243-251
Ellis, J.M. and Calkin, P.E. (Nature and distribution of glaciers, Neoglacial moraines, and rock glaciers, east-central Brooks Range, Alaska), 403-420
Ellis, S. *See* Griffey, N.J., 203-214
Energy balance: Mt. Logan snow surface, 1-16

Fahey, B.D. and Gowan, R.T. (Application of the sonic test to experimental freeze-thaw studies in geomorphic research), 253-260
Fierz, H. *See* Barsch, D., et al., 215-228
Flotron, A. *See* Haeberli, W., et al., 421-441
Freeze-thaw studies, 253-260

Geomorphic processes: debris slopes, Baffin Island, 371-402; mass wasting in avalanche paths, 17-32; rockfall, Baffin Island, 371-402; rockslide-avalanche in northern Washington, 33-40; sediment transport, 41-52
Glacial chronology: Baffin Island, Cumberland Peninsula, 179-202
Glacial geomorphology: Baffin Island sediments, 109-120; Brooks Range glaciers and moraines, 403-420; paleosols under moraine ridges, 203-214; Pasayten Valley, Washington rockslide-avalanche, 33-40
Glaciology: Brooks Range glaciers, 403-420; energy balance model of potential glacierization, 443-456; glacier fluctuations, Himalayas, 267-287; meltwater hydrochemistry, 307-324

Gowan, R.T. *See* Fahey, B.D. and Gowan, R.T., 253-260
Gregory, A.F. *See* Dey, B., et al., 229-242
Griffey, N.J. and Ellis, S. (Three in situ paleosols buried beneath Neoglacial moraine ridges, Okstindan and Jotunheimen, Norway), 203-214

Haeberli, W., King, L., and Flotron, A. (Surface movement and lichen-cover studies at the active rock glacier near the Grubengletscher, Wallis, Swiss Alps), 421-441
Haeberli, W. *See also* Barsch, D., et al., 215-228
Himalaya glacier fluctuations, 267-287
Hoffmann, R.S. *See* Andersen, D.C., et al., 467-476
Holocene sediments, Baffin Island, 109-130
Hydrochemistry: glacier meltwater, 307-324; subarctic Canadian lakes, 145-158

Jacobsen, E. *See* Staaland, H., et al., 457-466
Jeschke, P.A. *See* Mayewski, P.A. and Jeschke, P.A., 267-287

Kevan, P.G. (The spectral efficiency of phototaxis for some high arctic Diptera), 349-352
King, L. *See* Haeberli, W., et al., 421-441
Knighton, A.D. *See* Theakstone, W.H. and Knighton, A.D., 353-356

Lambert, R.L. and Reiners, W.A. (Nitrogen-fixing moss associations in the subalpine zone of the White Mountains, New Hampshire), 325-333
Laurentide Ice Sheet, 443-456
Lichen: cesium-137 persistence, 95-108; growth characteristics, Swiss Alps, 421-441
Limnology of subarctic Canadian lakes, 145-158
Little Ice Age, 215-228

Marcus, M.G. *See* Brazel, A.J. and Marcus, M.G., 1-16
Mayewski, P.A. and Jeschke, P.A. (Himalayan and trans-Himalayan glacier fluctuations since AD 1812), 267-287
Meltwater hydrochemistry, 307-324
Meteorology: energy balance, Mt. Logan, 1-16
Microclimate: ground temperatures during snowpatch meltout, 41-52; energy balance, Mt. Logan, Yukon, 1-16
Miller, P.C. *See* Oberbauer, S. and Miller, P.C., 69-81
Miller, G.H. *See* Stuckenrath, R., et al., 109-120
Montana: Glacier National Park, avalanche path terrain, 17-32
Moore, H. *See* Dey, B., et al., 229-242
Myers, J.P. and Pitelka, F.A. (Variations in summer temperature patterns near Barrow, Alaska: Analysis and ecological interpretation), 131-144

Natural hazards: avalanches, Glacier National Park, 17-32
Neoglacial moraines: Brooks Range, Alaska, 403-420; Norway, 203-214
New Hampshire: White Mountains moss associations, 325-333
Nitrogen fixation in moss associations, 325-333
Northwest Territories: *See also* Baffin Island; Keewatin, 243-251, 443-456
Norway: Austerdalsisen, moss colonization, 353-356; Okstindan and Jotunheimen moraine ridges, 203-214; reindeer digestive tracts, 457-466

Oberbauer, S. and Miller, P.C. (Plant water relations in montane and tussock tundra vegetation types in Alaska), 69-81
Okazaki, R. *See* Van Ryswyk, A.L. and Okazaki, R., 53-67
Olson, A.R. and Richards, J.H. (Temperature responses of germination in arctic poppy [*Papaver radicatum* Rottb.] seeds), 343-348

Paleoenvironment: Baffin Island glacial and sea-level history, 179-202, and Holocene sediments, 109-130; Himalayan glacier fluctuations, 267-287; Keewatin, N.W.T., treeline, 243-251; Norwegian paleosols, 203-214
Papaver radicatum germination, 343-348
Periglacial processes: freeze-thaw studies and sonic tests, 253-260; rock glaciers; Brooks Range, 403-420, Switzerland, 215-228, 421-441; snowpatch meltout, 41-52; talus rock glaciers, Baffin Island, 371-402
Permafrost: in rock glacier, Switzerland, 215-228
Pitelka, F.A. *See* Myers, J.P. and Pitelka, F.A., 131-144
Productivity: subalpine meadow, 467-476; subarctic Canadian lakes, 145-158

Radiation: Mt. Logan snow surface, 1-16
Radiocarbon dating: Baffin Island, 109-120
Reindeer digestive tracts, 457-466
Reiners, W.A. *See* Lambert, R.L. and Reiners, W.A., 325-333
Richards, J.H. *See* Olson, A.R. and Richards, J.H., 343-348
Rock glaciers: Brooks Range, 403-420; Swiss Alps, 215-228, 421-441
Rockfall: Baffin Island, 371-402
Rockslide-avalanche: northern Washington, 33-40
Ryder, J.M. *See* Church, M., et al., 371-402

Satellite imagery: for mapping sea ice, 229-242
Sea ice: breakup and freezeup, 229-242
Sea-level change: Baffin Island, 179-202
Shaver, G.R. and Cutler, J.C. (The vertical distribution of live vascular phytomass in cotton-

grass tussock tundra), 335-342
Snow: surface heat exchange, 1-16
Snowpatch meltout, 41-52
Soil: age and properties, Cumberland Peninsula, Baffin Island, 289-306; genesis and classification, 55-67; paleosols beneath moraine ridges, Norway, 203-214
Sonic testing in freeze-thaw studies, 253-260
Spalding, J.B. (The aeolian ecology of White Mountain Peak, California: windblown insect fauna), 83-94
Spectral efficiency of Diptera, 349-352
Stock, R.F. *See* Church, M., et al., 371-402
Staaland, H., Jacobsen, E., and White, R.G. (Comparison of the digestive tract in Svalbard and Norwegian reindeer), 457-466
Stuckenrath, R., Miller, G.H., and Andrews, J.T. (Problems of radiocarbon dating Holocene organic-bearing sediments, Cumberland Peninsula, Baffin Island, N.W.T., Canada), 109-120
Subalpine: avalanche terrain, 17-32; nitrogen-fixing moss associations, 325-333; productivity and floristic structure, 467-476; soils, 53-67
Subarctic: limnology, 145-158; paleosols, 203-214
Svalbard: reindeer digestive tracts, 457-466
Svoboda, J. and Taylor, H.W. (Persistence of cesium-137 in arctic lichens, *Dryas integrifolia*, and lake sediments), 95-108

Taylor, H.W. *See* Svoboda, J. and Taylor, H.W., 95-108
Theakstone, W.H. and Knighton, A.D. (The moss *Aongstoemia longipes*, an environmentally sensitive colonizer of sediments at Austerdalsisen, Norway), 353-356
Thorn, C.E. (Ground temperatures and surficial transport in colluvium during snowpatch meltout; Colorado Front Range), 41-52
Treeline: fluctuations, British Columbia, 53-67; Keewatin, N.W.T., 243-251
Tundra: tussock phytomass, 335-342; plant-water relations, 69-81

Van Ryswyk, A.L. and Okazaki, R. (Genesis and classification of modal subalpine and alpine soil pedons of south-central British Columbia, Canada), 53-67

Waitt, R.B., Jr. (Rockslide-avalanche across distributary of Cordilleran ice in Pasayten Valley, northern Washington), 33-40
Washington: Pasayten Valley, rockslide-avalanche, 33-40
White, R.G. *See* Staaland, H., et al., 457-466
Williams, L.D. (An energy balance model of potential glacierization of northern Canada), 443-456

Yukon: Mt. Logan heat exchange, 1-16
